

Epileptogenesis and Epilepsy Network

2nd DATA CLUB

Online
18th June 2021

Epileptogenesis and Epilepsy Network

*“from genes, synapses and circuits
to pave the way for novel drugs and strategies”*

2nd DATA CLUB

18th June 2021 (online)

Time: 14:00 - 17:00 (Lisbon) / 15:00 - 18:00 (Amsterdam, Brussels, Lund Rome)

*Schedule in Central Europe Time (CET) - Amsterdam / Lund / Rome

PROGRAMME:

15:00 - 15:15

Welcome + Summer School Presentation

15:15 - 15:45

Matilda Ahl (University of Lund)

“Inflammation in the eyes in rodent models of epilepsy: Investigation with histology, biochemistry and high resolution MRI”

15:45 - 16:00

Gabriele Ruffolo (Sapienza University of Rome)

“Focus on the role of cytokines in modulation of synaptic transmission in epilepsy”

16:00 - 16:15

Mark Luinenburg (Amsterdam Medical Centre)

“Dissecting the role of the complement pathway in epilepsy: link to mTOR dysregulation”

16:15 - 16:30

Break

16:30 - 16:45

Tatiana Morais (Cardiff University; Malta University)

“GABA uptake and behaviour tests for the study of absence seizures”

16:45 - 17:00

Miriam Sciaccaluga (Sapienza University of Rome)

“Amyloid- β : a potential link between epilepsy and cognitive decline”

17:00 - 17:15

Annemieke Rozeboom (Amsterdam Medical Centre)

“Loss of capillary low-density lipoprotein receptor-related protein 1 expression in the hippocampus of temporal lobe epilepsy and Alzheimer’s Disease patients “

17:15 - 17:30

Gabriel Miltenberger (Institute of Molecular Medicina, Lisbon)

“Clinical genetics within EpiEpiNet: potentiality of project participation”

17:30 - 18:15

Governing Council Meeting
